PROFESSIONAL SUMMARY

IT Infrastructure professional with enterprise experience spanning Desktop/Endpoint Support and Server Vulnerability Management in banking environments. Currently support ~400 users and 400–500 endpoints for an ICICI Bank engagement, maintaining 98% SLA compliance while resolving ~10 tickets/day across Windows 10/11, access, hardware, and application issues. Prior experience coordinating server vulnerability remediation across ~100 servers, contributing to the closure of 5+ lakh vulnerability findings within a one-month cycle. Hands-on exposure to Windows Server, Active Directory, and Microsoft Azure (VM provisioning, networking, App Service) through lab and self-driven project work. Microsoft Certified: Azure Fundamentals (AZ-900). Building toward Windows/Systems Administration and Azure infrastructure support roles.

CORE SKILLS

Windows & System Administration: Windows Server, Active Directory (AD DS), Domain Controller, DNS, DHCP, Organizational Units (OU), File Server, NTFS Permissions, Share Permissions, IIS, Hyper-V, VMware Workstation, Windows 10/11

Cloud & Azure: Microsoft Azure, Azure VM, VM Provisioning, Virtual Networking (VNet), Resource Management, Subscription Management, Azure App Service, Containers, Cloud Infrastructure

Endpoint & EUC: Microsoft Intune, Endpoint Management, Zero-Touch Installation, LANDesk, Zscaler, ARCON / ARCON PAM, ServiceNow, Windows Endpoint Support

Vulnerability & IT Operations: Vulnerability Management, Server Vulnerability Assessment, Patch Coordination, Remediation Tracking, Downtime Scheduling, Server Owner & Infrastructure Team Coordination, Incident Management

Data & Programming: Microsoft Excel (Lookups, Queries, PivotTables, Dashboards), Python (Intermediate), PowerShell (Intermediate), Docker, REST APIs, FastAPI

PROFESSIONAL EXPERIENCE

Desktop Support Engineer (L1) | Wipro Limited — ICICI Bank Project Jul 2023 – Present

- Support approximately 400 users and 400–500 endpoints in an enterprise banking environment, maintaining 98% SLA compliance while resolving ~10 tickets/day via ServiceNow.
- Troubleshoot Windows 10/11 issues spanning user access, software, hardware, networking, and application-related tickets.
- Manage endpoint provisioning through Zero-Touch installation activities and device ID recovery.
- Coordinate with the Active Directory team to add/remove devices during provisioning and recovery workflows.
- Administer and support endpoints using Microsoft Intune, LANDesk, Zscaler, and ARCON/ARCON PAM.

Project Coordinator, Server Vulnerability Management | Wipro Limited — IDFC Bank Project Jul 2022 – Jun 2023

- Coordinated vulnerability remediation across approximately 100 servers, helping drive closure of 5+ lakh vulnerability findings (Critical, High, Medium, Low) within a one-month cycle.
- Received and processed raw vulnerability assessment data from the ISG team, cleaning and structuring scrambled Excel datasets for analysis and reporting.
- Prepared patch schedules and coordinated downtime with server owners and infrastructure teams to enable remediation activities.
- Tracked remediation activities through closure and built reporting dashboards using Excel lookups, queries, PivotTables, and formulas.

PROJECTS (HANDS-ON / LAB)

Endpoint Sentinel X — Solo Project (~6 months, AI-assisted development)

- Designed and built a full-stack endpoint monitoring platform independently, covering hardware/OS inventory, real-time endpoint status and performance monitoring, alerting, security scoring, and real-time command orchestration.
- Implemented backend REST API with FastAPI and PostgreSQL, WebSockets for real-time updates, and a React/TypeScript frontend.

- Containerized the application with Docker and deployed the backend/application on an Azure VM (currently suspended when idle to manage cloud cost).

Windows Server Hands-On Lab

- Configured Active Directory Domain Services (AD DS), Domain Controller, DNS, DHCP, Organizational Units, Users and Groups in a lab environment.
- Set up File Server with NTFS and share permissions, and IIS, using Hyper-V and VMware Workstation for virtualization.

Azure Hands-On Labs

- Practiced Azure VM provisioning, virtual networking (VNETs), resource and subscription management, and Azure App Service container deployment.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Wipro Internal: Windows Server Administration (L1 & L2)
- Wipro Internal: EUC Administration (L2)
- Wipro Internal: Linux Administration (L1 & L2)
- Wipro Internal Assessments: Cloud & Azure Fundamentals; Cloud Infrastructure Administration (L1); Azure OpenAI (L1); GenAI & Copilot (L3); Google Gen AI (L1 & L2)

EDUCATION

- B.Tech, Information Science — BITS Pilani | Completed 2026 | Results Awaited
- Diploma, Computer Science & Engineering — Government Polytechnic Gaya | 2021

LOCATION

Patna preferred | Open to relocation PAN India, including Noida, Pune, and Kolkata
